

<b>Status Code</b>	<b>Description</b>	<b>Meaning</b>
<b>1xx</b>		
<b>Informational</b>		
100	Continue	The server has received the request headers and the client should proceed to send the request body.
101	Switching Protocols	The requester has asked the server to switch protocols and the server has agreed to do so.
<b>2xx Success</b>		
200	OK	The request has succeeded.
201	Created	The request has been fulfilled, resulting in the creation of a new resource.
202	Accepted	The request has been accepted for processing, but the processing has not been completed.
204	No Content	The server successfully processed the request and is not returning any content.
<b>3xx</b>		
<b>Redirection</b>		
301	Moved Permanently	The resource requested has been permanently moved to a new URL.
302	Found (Previously "Moved Temporarily")	The resource requested is temporarily under a different URL.
304	Not Modified	The resource has not been modified since the last request.
<b>4xx Client Error</b>		
400	Bad Request	The server cannot or will not process the request due to a client error.
401	Unauthorized	The request requires user authentication.
403	Forbidden	The server understood the request but refuses to authorize it.
404	Not Found	The server cannot find the requested resource.

Status Code	Description	Meaning
405	Method Not Allowed	The request method is known by the server but is not supported by the target resource.
<b>5xx Server Error</b>		
500	Internal Server Error	The server encountered an unexpected condition that prevented it from fulfilling the request.
501	Not Implemented	The server does not support the functionality required to fulfill the request.
502	Bad Gateway	The server, while acting as a gateway or proxy, received an invalid response from the upstream server.
503	Service Unavailable	The server is currently unable to handle the request due to temporary overloading or maintenance.
504	Gateway Timeout	The server, while acting as a gateway or proxy, did not receive a timely response from the upstream server.
